

SITE SIGNALIZATION

PLACE IT!

FORBIDDEN TO:

- Work on unsignalized position
- Workers staying in unsecured excavations
- People being within the range of machine devices
- Moving the working machine on slopes exceeding the permissible degree specified in the machine's technical documentation
- Perform earthworks under active, overhead power lines at a distance less than specified in the specific provisions
- Leave workplace without any signalization

**HIGHLIGHT YOUR WORKPLACE,
YOUR LIFE AND OTHER LIVES!**

If signage wasn't important New York wouldn't be like it is!
